# ABOUT THE CONFERENCE

## CONFERENCE SUMMARY

*We live in a digital and interconnected world where digital tools, and increasingly, Artificial Intelligence, are shaping all human interactions and necessarily affect the law itself. The digital age challenges the traditional way of thinking, understanding, regulating, applying and enforcing fundamental legal concepts. This conference takes specific junctures between law and the digital world as a starting point for a wider academic exchange which will feed into the ongoing legal debate on law, society and human rights in the digital age.*
